

ACTi IP Speed Dome Enhanced the Security and Productivity of Pinnacle@Duxton

Taipei, Taiwan, November 16, 2005 –Nextan, a system integrator and with IT related experience in Singapore, successfully helped Pinnacle@Duxton to enhance the security and productivity in the construction site by setting up ACTi's CAM-6200 IP speed dome and outdoor wireless applications.

The Pinnacle@Duxton is the highest class public housing (subsidized by government) ever in Singapore by the Housing Development Board (HDB). In order to prevent accidents happening and strengthen the security at the construction site, an integrated surveillance speed dome is required to be set on the top of a nearby building for 24-hour surveillance.

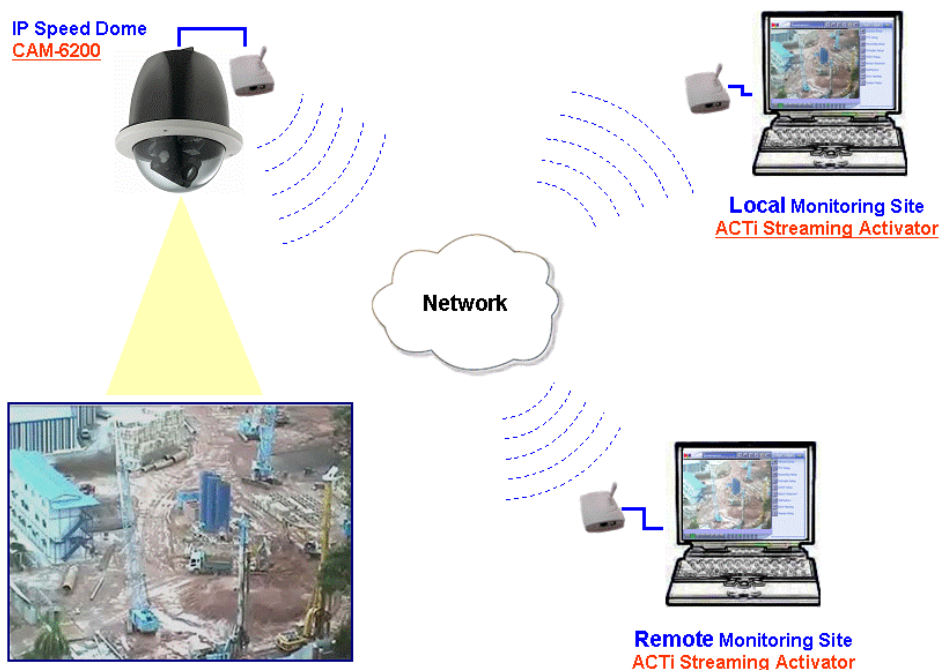

Nevertheless, it was very difficult to establish the wiring at the construction site since the network infrastructure here is incomplete and the camera will be relocated to monitor different places. Therefore, IP surveillance products along with wireless applications were strongly recommended to be implemented in this project.

Why chose ACTi? ACTi products use Advanced MPEG4 compression technology. MPEG4 provides higher compression ratio and much lower bandwidth demand. Although in Singapore the bandwidth is limited (128k upload), ACTi still could perform better video quality (8fps @ CIF) comparing to M-JPEG products. Furthermore, due to MPEG4 compression technology, ACTi products are working very well with WiFi devices. This feature makes the network transmission smoother and also reduces the cabling cost.

Besides, by using ACTi Streaming Activator and Streaming Explorer, clients could easily access live process of the construction by typing a specific IP address onto the browser window. They could just stay at home and all the possible emergencies would be handled promptly.

In conclusion, ACTi products offers better video quality at limited bandwidth and user-friendly software. Most importantly, it helps customers to save much more system cost. Therefore, ACTi is the best choice for IP surveillance solutions.

“ ACTi CAM-6200 has the excellent video quality at very low bandwidth, and ACTi’s technical supporting is speedy & responsible, so ACTi’s system is good value for money, these are the reasons why we cooperate with ACTi for Pinnacle project and the projects in the future” -- Daniel Tan, Project Consultant, NEXTAN Pte Ltd.

About ACTi

ACTi is the leading product developer and manufacturer of MPEG-4 IP surveillance product solutions. ACTi is able to deliver MPEG-4 ASP compliant video streams at Full D1 resolution and 30/25 frames per second. ACTi offers most complete product line and provides one-stop-shopping convenience for IP surveillance solutions including but not limited to MPEG-4 IP camera, video server, transcoder, MPEG-4 nDVR. ACTi also offer application software and SDKs. ACTi is the best choice and reliable partner in IP surveillance market. Please visit www.acti.com for more information about ACTi.
